Alpha Pharma

Alpha Pharma is an Indian pharmaceutical company that has gained wide popularity among professional bodybuilders and other representatives of heavy sports. It first entered the world market in 2005 and today is one of its leaders.

The company is engaged in the production of various medications, believing that everyone, regardless of location and social status, has the right to qualified medical care. However, the company became famous precisely thanks to the production of sports pharmacology, represented by almost all existing drugs. You can buy Alpha Pharma products in any form of release: in tablets, oily or aqueous solutions for injection.

The company places particular emphasis on the production of hormonal drugs, including growth hormones, which are widely used in sports for weight gain.

Alpha Pharma actively collaborates not only with leading sports doctors, but also with scientific researchers from around the world, studying the body's reaction to certain substances. This allows the company not to stop there, improving its product and expanding the range.

The company takes pride in its innovative equipment that automates the production of steroids. However, this does not preclude the participation of an entire staff of qualified employees.

Alpha Pharma manufactured products and their quality assurance. For more than 10 years, Alpha Pharma has been represented on the world market of sports pharmacology with a large assortment of drugs, the most popular of which are:

anabolic drugs – **Alphabol**, **Oxanabol**
injectable steroids – **Boldebolin (vial)**, **Alphabolin (vial)**, **Trenbolin (vial)**.
drugs for post-cycle therapy – **Clomiphene**, **Letromina**, **Altamofen**, **HCG**.

The high demand to buy Alpha Pharma products has spawned a huge number of fakes. Therefore, the company introduced additional protection for its products.
